Glossary

MMF

Money Market Fund. A low-risk investment that holds short-term, interest-bearing instruments. Used by GEF for capital preservation and yield.

Net assets

Total assets minus total liabilities. For GEF, this represents the fund's net wealth at a point in time.

Deployment / Use of funds

Outflows from the fund used to support beneficiaries (JAMB/WAEC forms, tutorial fees, stipends, scholarships, gifts).

WAEC

West African Examinations Council. Conducts the WASSCE secondary school exit exam. Form fees are a common deployment category.

Runway

Estimated number of months the fund could sustain current deployment levels using existing assets.

Placements

Fixed deposits or term placements with banks/financial institutions. Funds are locked for a defined tenor in exchange for a fixed interest rate.

Net income

Total revenue (donations + investment income + other income) minus total expenses (deployments + fees) over the period.

JAMB

Joint Admissions and Matriculation Board. The Nigerian body that runs the UTME exam for university admission. Form fees are a common deployment category.

Weighted average yield

Average annualised interest rate across all interest-bearing instruments, weighted by the balance held in each.

Net Income Bridge

A waterfall view that walks from revenue line items down through expenses to arrive at net income.
